Portfolio Manager

Portfolio Manager is an interactive resource management tool that enables you to monitor and optimize your municipalities energy use and compare it to others in its class.

Making it the industry-leading benchmarking tool and serving as the national benchmarking tool in Canada.

And it's the only place you can apply for ENERGY STAR building certification.

Free, on-line, and secure platform

Energy benchmarking for municipalities

A municipality's real estate portfolio may include many types of buildings, including offices, community and recreational centres, arenas and other sporting facilities, libraries, and warehouses. All of these buildings, despite their differences, have one thing in common: they all use energy, and that energy accounts for a significant part of a municipality's operating budget.

Energy benchmarking is an effective way to reduce operating costs without compromising service levels. By tracking a building's energy use and comparing it to the energy used by other buildings in your portfolio or across the country, you can identify both best practices and candidates for improvement.

ENERGY STAR Portfolio Manager can help you build a better city by providing you with nationally standardized, statistically valid, Canadian data against which to benchmark your buildings' energy use.
